

WHAT IS CLAIMED IS:

1. A stylus for physically contacting a touch-sensitive screen, the stylus  
5 comprising:  
a plurality of elements connected together by hinges or joints to form part of  
an accordion-style extendable instrument; and  
an additional element, connected to the part of the accordion-style extendable  
instrument by at least one additional hinge or joint,  
10 wherein the additional element has or supports a stylus tip for contacting the  
touch-sensitive screen.
2. The stylus of claim 1, wherein the stylus tip is at a distal end of the  
additional element, and is extendable away from the plurality of elements.  
15
3. The stylus of claim 2, wherein the stylus tip has a point that is sufficiently  
blunt to contact the touch-sensitive screen without scratching.
4. The stylus of claim 1, wherein the plurality of elements mostly have  
20 substantially equal length.
5. The stylus of claim 1, wherein the plurality of elements have respective  
lengths so that the stylus in a folded configuration has a substantially circular  
perimeter.  
25
6. The stylus of claim 1, further comprising a spring for automatically  
extending the stylus.
7. The stylus of claim 6, further comprising a button for activating the spring.  
30
8. The stylus of claim 1, further comprising a touch-screen activation unit.

9. The stylus of claim 8, wherein the activation unit is a key.
10. The stylus of claim 1, having an extended configuration that is sufficiently  
5 flat so that the extended configuration has a depth less than one quarter of a standard number two pencil's depth.
11. A mobile terminal comprising:  
a touch-sensitive screen;  
10 a stylus having an accordion style; and  
an enclosure for storing the stylus in a folded configuration.
12. The mobile terminal of claim 11, further comprising a tether for tethering  
the stylus to the mobile terminal.
- 15 13. The mobile terminal of claim 11, wherein the stylus comprises a mobile terminal activation unit.
14. The mobile terminal of claim 11, wherein the mobile terminal activation unit  
20 is a key.
15. An extendable accordion-style stylus comprising:  
a plurality of elements;  
a plurality of hinges or joints connecting the plurality of elements; and  
25 a tip for contacting at least one part of a mobile terminal.
